

PATENT
10/660,072

1 1. (currently amended) In a World Wide Web (Web)
2 communication network with user access via a plurality of
3 data processor controlled interactive receiving Web display
4 stations for displaying, in a standard display interface
5 format, received hypertext Web documents of at least one
6 display page containing text and images accessible from
7 sources on the Web and hyperlinks to other Web documents, a
8 system for selectively customizing the display interface
9 format of Web documents bookmarked at a receiving display
10 station comprising:
11 means for bookmarking a received Web document;
12 means for predetermining at least one display interface
13 format alternate to said standard display interface format
14 for bookmarked Web documents;
15 ~~means for providing a document folder associated with~~
16 ~~each alternate display interface format, said document~~
17 ~~folder providing each Web document put into said folder with~~
18 ~~a set of predetermined characteristics and values defining~~
19 ~~said alternate display interface format;~~
20 means, responsive to said bookmarking means, for
21 enabling a user to put a bookmarked Web document into a
22 document folder associated with an alternate display
23 interface format; and
24 means for displaying bookmarked documents in said
25 document folder in said alternate display interface format.

AUS920030309US1

2

PATENT
10/660,072

1 2. (currently amended) The Web system of claim 1 further
2 including:
3 means for further bookmarking a hyperlink in a
4 bookmarked Web document in a document folder associated with
5 an alternate display interface format; and
6 means, responsive to said means for further
7 bookmarking, for putting the Web document accessed through
8 further bookmarked hyperlink into the document folder
9 associated with said alternate display interface format.
10 ~~whereby~~ wherein said further bookmarked Web document may
11 also be displayed in said same alternate display interface
12 format.

1 3. (currently amended) The Web system of claim 1 further
2 comprising:
3 Web browsing means at said receiving display station
4 including:
5 said means for bookmarking a received Web document;
6 said means for predetermining at least one display
7 interface format alternate to said standard display
8 interface format for bookmarked Web documents;
9 ~~said means for providing a document folder associated~~
10 ~~with each alternate display interface format;~~
11 said means for enabling a user to put a bookmarked Web
12 document into a document folder associated with an alternate
13 display interface format; and
14 said means for displaying bookmarked documents in said
15 document folder in said alternate display interface format.

AUS920030309US1

3

PATENT
10/660,072

1 4. (currently amended) The Web system of claim 3 wherein
2 said browsing means further comprise:
3 means for further bookmarking a hyperlink in a
4 bookmarked Web document in a document folder associated with
5 an alternate display interface format; and
6 means, responsive to said means for further
7 bookmarking, for putting the Web document accessed through
8 further bookmarked hyperlink into the document folder
9 associated with said alternate display interface format,
10 ~~whereby~~ wherein said further bookmarked Web document may
11 also be displayed in said same alternate display interface
12 format.

1 5. (currently amended) The Web system of claim 1 wherein
2 said means for predetermining provides a plurality of said
3 alternate display interface formats; and
4 ~~said means for providing respectively provides further~~
5 including a document folder associated with each of said
6 alternate display interface formats.

1 6. (original) The Web system of claim 5 wherein said means
2 for enabling a user to put a bookmarked Web document into a
3 document folder permits the user to put the bookmarked
4 document into a plurality of folders respectfully associated
5 with a plurality of alternate display interface formats.

1 7. (original) The Web system of claim 5 wherein said means
2 for displaying simultaneously displays said plurality of Web
3 documents having said alternate formats in respective
4 separate windows.

AUS920030309US1

4

PATENT
10/660,072

1 8. (currently amended) In a World Wide Web (Web)
2 communication network with user access via a plurality of
3 data processor controlled interactive receiving Web display
4 stations for displaying, in a standard display interface
5 format, received hypertext Web documents of at least one
6 display page containing text and images accessible from
7 sources on the Web and hyperlinks to other Web documents, a
8 method for selectively customizing the display interface
9 format of Web documents bookmarked at a receiving display
10 station comprising:
11 bookmarking a received Web document;
12 predetermining at least one display interface format
13 alternate to said standard display interface format for
14 bookmarked Web documents;
15 providing a document folder associated with each
16 alternate display interface format, said document folder
17 providing each Web document put into said folder with a set
18 of predetermined characteristics and values defining said
19 alternate display interface format;
20 enabling a user to put a bookmarked Web document into a
21 document folder associated with an alternate display
22 interface format; and
23 displaying bookmarked documents in said document folder
24 in said alternate display interface format.

AUS920030309US1

5

PATENT
10/660,072

1 9. (currently amended) The method of claim 8 further
2 including the steps of:
3 further, bookmarking a hyperlink in a bookmarked Web
4 document in a document folder associated with an alternate
5 display interface format; and
6 putting the Web document accessed through further
7 bookmarked hyperlink into the document folder associated
8 with said alternate display interface format, ~~whereby~~
9 wherein said further bookmarked Web document may also be
10 displayed in said same alternate display interface format.

AUS920030309US1

6

PATENT
1C/660,072

- 1 10. (original) The method of claim 8 further comprising:
2 a Web browsing process at said receiving display
3 station including said steps of:
4 bookmarking a received Web document;
5 predetermining at least one display interface
6 format alternate to said standard display interface
7 format for bookmarked Web documents;
8 providing a document folder associated with each
9 alternate display interface format;
10 enabling a user to put a bookmarked Web document
11 into a document folder associated with an alternate
12 display interface format; and
13 displaying bookmarked documents in said document
14 folder in said alternate display interface format.
- 1 11. (currently amended) The Web method of claim 10 wherein
2 said Web browsing process further comprises said steps of:
3 further bookmarking a hyperlink in a bookmarked Web
4 document in a document folder associated with an alternate
5 display interface format; and
6 putting the Web document accessed through said further
7 bookmarked hyperlink into the document folder associated
8 with said alternate display interface format, ~~whereby~~
9 wherein said further bookmarked Web document may also be
10 displayed in said same alternate display interface format.

AUS920030309US1

7

PATENT
10/660,072

1 12. (original) The method of claim 8 wherein said step of
2 predetermining provides a plurality of said alternate
3 display interface formats; and
4 said step of providing respectively provides a document
5 folder associated with each of said alternate display
6 interface formats.

1 13. (currently amended) The method of claim 12 wherein said
2 ~~step of enabling a~~ user ~~is enabled~~ to put a bookmarked Web
3 document into a document folder ~~to permit~~ permits the user
4 to put the bookmarked document into a plurality of folders
5 respectfully associated with a plurality of alternate
6 display interface formats.

1 14. (currently amended) The method of claim 12 wherein said
2 ~~means for step of~~ displaying simultaneously displays said
3 plurality of Web documents having said alternate formats in
4 respective separate windows.

AUS920030309US1

8

PATENT
1C/660,072

1 15. (currently amended) A computer program having code
2 recorded on a computer readable medium for selectively
3 customizing the display interface format of Web documents
4 bookmarked at a receiving display station in a World Wide
5 Web (Web) communication network with user access via a
6 plurality of data processor controlled interactive receiving
7 Web display stations for displaying, in a standard display
8 interface format, received hypertext Web documents of at
9 least one display page containing text and images accessible
10 from sources on the Web and hyperlinks to other Web
11 documents, said computer program comprising:
12 means for bookmarking a received Web document;
13 means for predetermining at least one display interface
14 format alternate to said standard display interface format
15 for bookmarked Web documents;
16 ~~means for providing a document folder associated with~~
17 ~~each alternate display interface format, said document~~
18 ~~folder providing each Web document put into said folder with~~
19 ~~a set of predetermined characteristics and values defining~~
20 ~~said alternate display interface format;~~
21 means, responsive to said bookmarking means, for
22 enabling a user to put a bookmarked Web document into a
23 document folder associated with an alternate display
24 interface format; and
25 means for displaying bookmarked documents in said
26 document folder in said alternate display interface format.

AUS920030309US1

9

PATENT
10/660,072

1 16. (currently amended) The computer program of claim 15
2 further including:
3 means for further bookmarking a hyperlink in a
4 bookmarked Web document in a document folder associated with
5 an alternate display interface format; and
6 means, responsive to said means for further
7 bookmarking, for putting the Web document accessed through
8 further bookmarked hyperlinks into the document folder
9 associated with said alternate display interface format,
10 ~~whereby wherein~~ said further bookmarked Web document may
11 also be displayed in said same alternate display interface
12 format.

1 17. (currently amended) The computer program of claim 15
2 further comprising:
3 a Web browser program at said receiving display station
4 including:
5 said means for bookmarking a received Web
6 document;
7 said means for predetermining at least one display
8 interface format alternate to said standard display
9 interface format for bookmarked Web documents;
10 ~~said means for providing a document folder~~
11 associated with each alternate display interface
12 format;
13 said means for enabling a user to put a bookmarked
14 Web document into a document folder associated with an
15 alternate display interface format; and
16 said means for displaying bookmarked documents in
17 said document folder in said alternate display
18 interface format.

AUS920030309US1

10

PATENT
1C/660.072

1 18. (currently amended) The computer program of claim 17
2 wherein said Web browser program further comprises:
3 means for further bookmarking a hyperlink in a
4 bookmarked Web document in a document folder associated with
5 an alternate display interface format; and
6 means, responsive to said means for further
7 bookmarking, for putting the Web document accessed through
8 further bookmarked hyperlinks into the document folder
9 associated with said alternate display interface format,
10 ~~whereby~~ wherein said further bookmarked Web document may
11 also be displayed in said same alternate display interface
12 format.

1 19. (currently amended) The computer program of claim 15
2 wherein said means for predetermining provides a plurality
3 of said alternate display interface formats; and
4 ~~said means for providing respectively provides~~ further
5 including a document folder associated with each of said
6 alternate display interface formats.

1 20. (original) The computer program of claim 19 wherein said
2 means for displaying simultaneously displays said plurality
3 of Web documents having said alternate formats in respective
4 separate windows.
